RETURN RECEIPT REQUESTED

Mr. William Bown
Utah Building Stone Supply
842 West 400 North
West Bountiful, Utah 84087

Dear Mr. Bown:

Your Notice to conduct mining exploration operations under BLM's 3809 surface mining regulations was received on January 30, 1995 and we have assigned your Enterprise (Millsite) operation Section 31, T. 13 N., R. 13 W., SLM in western Box Elder County, Utah, case file number U-72297.

- Refer to this number in any future correspondence, pertaining to the Enterprise (Millsite) operation
- Amend your notice if there are significant changes during your 1995 operation
- Submit a new notice for activities in 1996 if there are significant changes in your operation.
- Please advise us of the status of your activities on the anniversary of your notice

In accordance with 43 CFR 3809, we are accepting your notice of intent to conduct mining operations and advising you that your mining activity will occur concurrently with other activities on the public lands. A review of your proposed operation by our resource staff raised the following concerns. When proceeding with your on-the-ground operations, please inform your field personnel of the following concerns and take the necessary precautions to prevent undue damage or degradation to these resources:

1. The cultural clearance conducted by JoAnn Vosskuhler, archeologist, in September of 1991 is sufficient to cover the area involved in your new proposal. No significant cultural resources were found during the inventory, however, should surface or subsurface cultural resources be discovered during the construction of your proposed expansion, operations will cease and the Bear River Resource Area Manager notified

immediately.

2. During the construction of your proposed expansion, all topsoil (6" to 12" of surface material including vegetation) will be removed, saved and maintained for reclamation purposes.
3. Topsoil stored for a long term should be stabilized by planting grass species on the stockpile and crimping in 1 ton per acre mulch.
4. During construction of your proposed expansion a proper water drainage system should be installed so as to not allow any standing pools of water on the mill site.
5. Noxious weeds are an increasing problem. Utah Building Stone Supply should take an active role in preventing the spread of noxious weeds in the area. The control of noxious weeds must be conducted in accordance with local, state, and federal laws.

Copies of the information provided in this Notice will be forwarded to the Utah Division of Oil, Gas, and Mining (UDOGM). As such, you will not be required to provide this information to UDOGM, however, reclamation under this Notice is required within specifications of the Utah Mined Land Reclamation Act. Copies of the information provided in this Notice have also been forwarded to the Utah Division of Water Quality.

The acceptance of this notice does not serve as a determination of the validity, or lack thereof, of any mining claim associated with this notice.

The acceptance of this amendment to your notice does not authorize any use of adjacent private lands.

If you have any questions, please feel free to contact Dan Washington at (801) 977-4300.

Sincerely yours,

My name (Acting)

Leon E. Berggren
Bear River Resource Area Manager
